

29th annual

Special Problems in Traffic Crash Reconstruction

May 2 - 6, 2011
Jacksonville, Florida

Conference fee: ~~\$695~~ **\$595**

IPTM's *Special Problems in Traffic Crash Reconstruction* features some of the biggest names in the crash investigation field. From racecar design to real world studies, the conference will highlight the very latest techniques in use today along with the advances that technology will bring tomorrow.

In addition, the conference offers valuable networking opportunities – including our networking reception scheduled for the first night – where you can learn from each other. It is your chance to make connections and discuss tips and tools of the trade with other crash reconstruction experts from throughout the world.

Staged collisions:

A series of live, staged collisions are once again the centerpiece of the conference. Multiple motorcycle crashes will be conducted as we look at the crush and momentum solutions for motorcycle-to-car collisions and show you the techniques that can be used in specific crashes in order to make accurate speed estimates. In addition, two separate rollover collisions will be conducted so that we can examine the dynamics of the rolling vehicles and develop a system to assist you in calculating the vehicles' speeds.

General session topics:

- NASCAR Safety Innovations
- Working the Crush and Momentum Solutions for Motorcycle-to-Car Collisions

Breakout session topics:

- Safe Following Distances and Nighttime Driving Speeds for Commercial Vehicles
- Police and Other Fleet Vehicle Crash Concerns and Special Circumstances
- What's New in Event Data Recorders
- Applying EDR Data to Reconstruction: Real World Case Studies
- Bicycle Crash Investigation – Things That Matter!
- Crash Data Collection Guide for GM Airbag Electronic Control Units
- Simulation 101 (Using Simulation Software to Reconstruct a Crash)
- Traffic Signal Timing Essentials
- Tires, Tire Forces and Stability
- Basic Physics for Crash Reconstruction
- An Introduction to Energy Concepts in Traffic Crash Reconstruction/Investigation
- Introduction to Microsoft Excel for Traffic Crash Reconstruction
- Portable GPS Usage in Crash Investigation and Other Criminal Activities

Preferred Conference Hotels

To keep travel costs low, IPTM has negotiated special rates at the two hotels listed below.

Each hotel offers **free breakfast** and free shuttle service to and from IPTM.

\$39 per night (single)

\$49 per night (double)
(plus 13% tax)

To receive the special rates,
